Instructions for Rig Move Permits

1. Rig move permits are valid for a 5 day period and are valid for the route listed on the permit only.
 - a. If an extension is needed because of extenuating circumstances please contact Converse County Road and Bridge.
2. These permits are valid for the movement of the rig and supporting components. The permits need to be completely and properly filled out and present in the vehicle.
 - a. Eighty (80) oversize and/or overweight loads within Class C limits (less than 160,000 pounds are included.)
 - b. Five (5) Class A permits for loads over 160,000 pounds are also included.
 - c. Oversize and/or overweight equipment that are facilitating the move but not an actual component of the rig are not included in the rig move permit. Those permits will need to be purchased separately and/or if within Class C and B limits, can be self-issued.
3. All loads must comply with oversize and overweight rules, safety regulations, and permit class maximums.
4. Oversize load signs with proper flagging are required on all oversize loads.
5. Rig move permits are an alternative to individual load permits and will be issued when requested 72 hours prior to the rig move.
6. Sub-contractors are allowed to use your permits but is your responsibility to verify they have valid
 - a. Wyoming Contract Operating Authority, Wyoming registration, Current liability insurance coverage beforehand.
7. The 5 super load permits need to be returned to Converse County Road and Bridge within 72 hours of completion of the rig move.
